

Mathseeds Lessons

This is the heart of the **Mathseeds** world – 50 math lessons that travel through 10 exciting maps with a new map released every six weeks. Each lesson has more than 10 activities plus a book, a pet and golden acorn rewards.

First Steps

The **first 20 lessons** cater to children who are just starting out. Children learn early number skills including recognizing the shape of numbers 0 – 10, accurate counting and one-to-one correspondence. Children also learn 2D shapes: circle, square, triangle and rectangle, colors and some concepts of size: big, small, short, tall.

Developing Skills

Lessons 21 – 50 introduce children to addition with a variety of counting strategies to add to 10. These include counting individual items, using a ten frame and using a number line. Children learn to recognize simple shape patterns and 3D objects. Measurement concepts covered include heavy, light, long, short, full, empty and half-full. The lessons are packed full of mathematical content covered in a fun, interactive and child friendly way with lots of songs.

The Playroom

Includes over 70 activities. This virtual playroom is where young children play with numbers, shapes, patterns, number books and 10 great songs.

My Treehouse

Each child has their own treehouse which they can decorate in their own style. They can also place their lesson pets here.

Buddy's Shop

Your child can spend their golden acorns in Buddy's shop on new looks for their avatar and decorations for their treehouse.

My Awards

Children earn a certificate for each map they complete. These can be printed and displayed.

My Avatar

Children can create their own acorn character with customized features and accessories.

Arcade

Contains 8 fun math-based games that your child can play using their golden acorns.
